# Logistics That Work for You – Not the Other Way

In today's competitive world, logistics is more than just shipping. You need a partner who can turn supply chain headaches into strategic advantages.

With Cargo Dynamic, your freight is managed by industry experts who live and breathe efficiency, risk management, and hands-on support

## What you get with Cargo Dynamic

**Tailored Solutions:** We design logistics plans tailored to your exact needs with no copy-and-paste solutions.

**Seamless Integration:** We manage every step across sea, air, and road, so you never have to chase your cargo.

**Proactive Risk Management:** We anticipate problems before they happen, so you don't have to react to them.

**Complete Transparency:** Our advanced tracking systems provide you with real-time visibility and control over every move.

## What truly sets us apart?

Real people, real expertise. You get a dedicated contact who manages your project from start to finish.

With over 50 years of combined leadership experience in global logistics.

We don't make promises; we deliver with precision

/ Introduction

# YOUR GATEWAY TO GLOBAL SHIPPING

FCL  
LCL

*Navigating global sea freight is complex. We make it simple.*

Your focus should be on your business, not on the challenges of shipping. Our team acts as your dedicated partner, managing every detail of your ocean shipment to ensure a smooth, predictable, and cost-effective journey.

**Reliability:** Through optimised routes with the world's most trusted carriers.

**Flexibility:** With tailored solutions for FCL, LCL and specialised Out-of-Gauge (OOG) projects.

**Peace of Mind:** Thanks to our integrated customs experts who handle all compliance to prevent costly delays at port.

**FCL (Full Container Load):** Get a dedicated container for your shipment to maximise space, security, and savings. Fewer handling stages reduce the risk of damage or loss for large shipments.

**LCL (Less than Container Load):** Pay only for the space you need. This is perfect for smaller or more frequent shipments without sacrificing service quality.

**Project Cargo & Breakbulk:** For oversized or complex shipments that don't fit in standard containers, our Project Cargo service provides expert planning and specialised equipment to ensure safe, timely delivery.

**Did you need it there yesterday?**

Our air freight team makes the world smaller, delivering the speed and security your time-critical shipments demand.

**We turn urgency into a competitive advantage.**

# FAST. FLEXIBLE. & RELIABLE AIR FREIGHT

**Tailored Speed:** Choose from express or standard delivery options to fit your urgency and budget.

**Time-Critical Delivery:** Ideal for urgent cargo, high-value goods, perishables, and temperature-sensitive items.

**True Global Reach:** Our extensive airline network ensures quick and efficient delivery worldwide.

**Priority Customs Clearance:** We streamline customs for smooth, on-time shipments.

**Real-Time Tracking:** Monitor your shipment's status at every stage with our digital tracking system.

**/ Air Freight**

# RESPONSIVE ROAD FREIGHT THAT DELIVERS

When reliability and flexibility are non-negotiable, our road freight network steps up. From a single pallet to a full truckload, we make your domestic and European moves easy, secure, and efficient.

## **Our Road Freight network provides:**

**FTL (Full Truck Load):** Dedicated capacity, faster transit times, and minimal handling, perfect for large-volume moves or sensitive cargo.

**LTL (Less than Truck Load):** Economical and reliable options for smaller shipments, allowing you to pay only for the space you need.

**Express & Last-Mile Delivery:** When time is critical, our express services ensure your shipment arrives precisely on schedule.

**Seamless UK & European Reach:** Cross-border transport with no headaches. We handle all customs and compliance for you.

Complex project logistics require a partner who knows every single detail matters.

Our dedicated project team delivers complete end-to-end management, turning your most significant challenges into successful outcomes.

Our project expertise includes:

**Heavy, Oversized & OOG Cargo:**

We design and execute the right plan, from initial site surveys and route planning to final delivery and installation.

**Seamless Multimodal Transport:**

We integrate sea, air, and road transport into a single, efficient plan optimised for speed and cost-effectiveness.

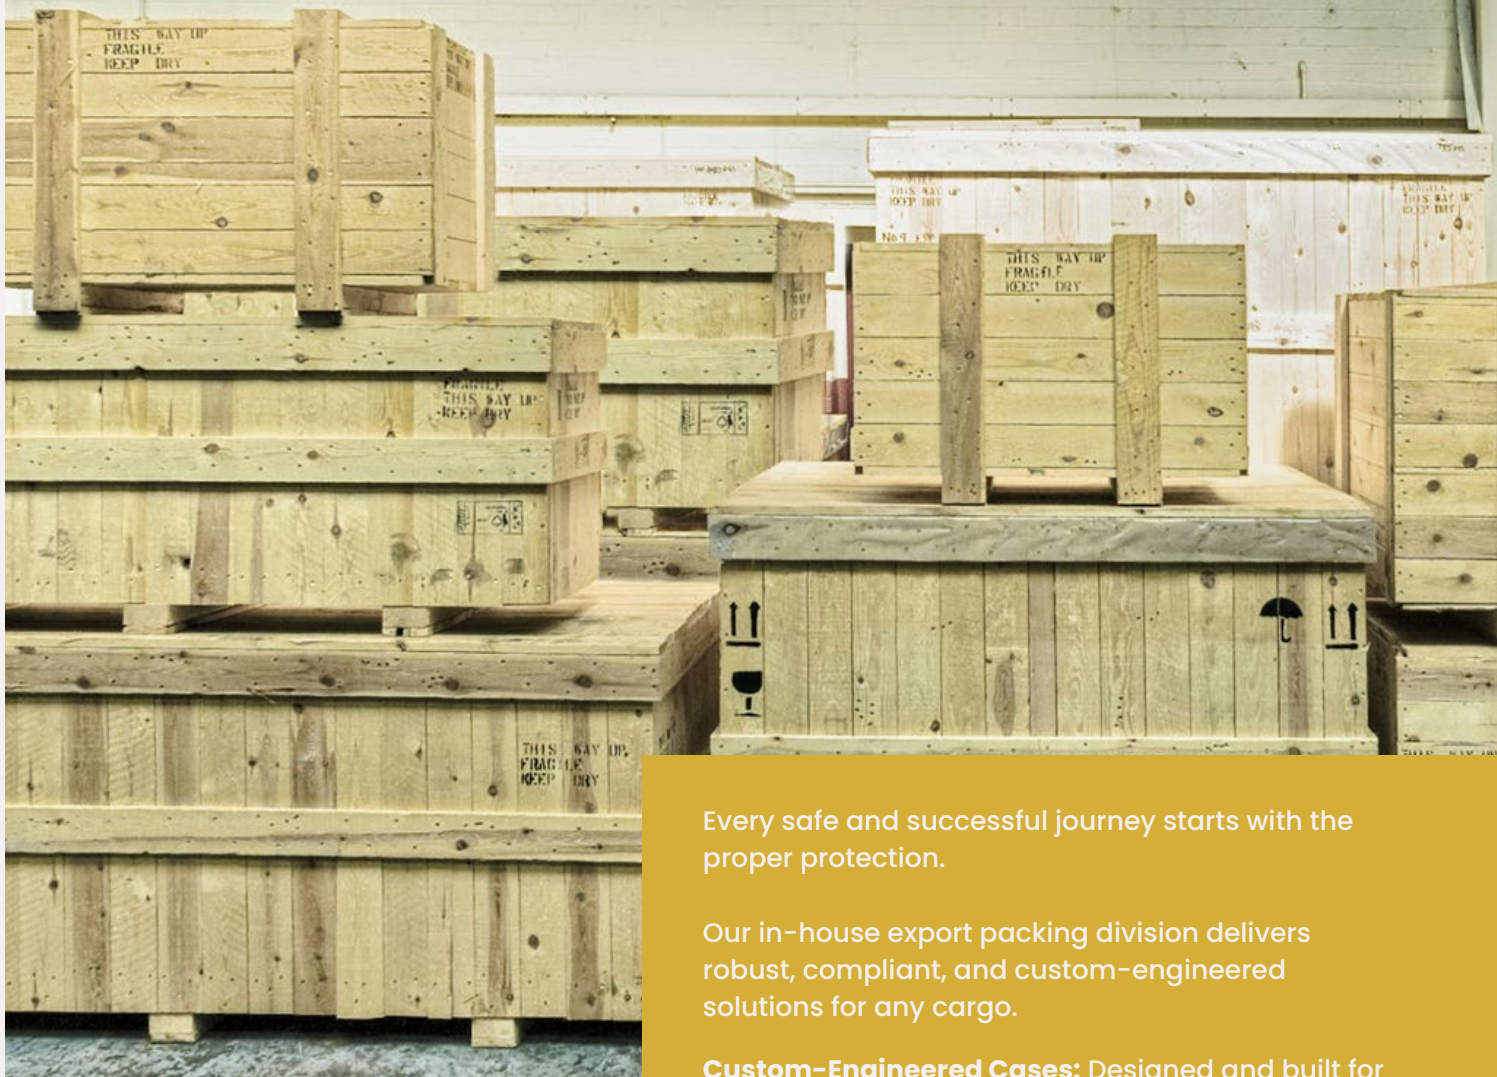

# NO CARGO TOO BIG NO CHALLENGE TOO COMPLEX

**Specialised Equipment:** From heavy-lift cranes and bespoke transport to custom-engineered packing, we have every technical requirement covered.

**Complete Risk Assessment & Mitigation:** Our experts anticipate and neutralise every potential challenge, ensuring your high-value assets are protected.

# Protection Engineered for the Real World.

Every safe and successful journey starts with the proper protection.

Our in-house export packing division delivers robust, compliant, and custom-engineered solutions for any cargo.

**Custom-Engineered Cases:** Designed and built for your specific cargo, from delicate electronics and fine art to the heaviest industrial equipment.

**Guaranteed Global Compliance:** We adhere strictly to ISPM 15, BS 1133, and all major global standards for seamless international clearance.

**Hazardous Goods Certified:** We are fully certified to pack, label, and document the most challenging hazardous cargo for IATA, ADR, and IMDG transport.

**On-Site Packing Teams:** We bring our expertise to you. Our mobile teams can manage packing at your facility, anywhere in the UK or globally.
